- Stripe
- Node js
- Vue
- Prisma
- Authentication (Auth0)
- SQL
- Git & GitHub
- Chrome Dev Tools
- Express js

LANGUAGES

- English | Advanced. TOEIC
- Spanish | Native

OBJECTIVE

Coding is my form of art. I've had the privilege to do it for amazing companies as well as personal projects. Computer science takes you from being someone with a lot of ideas to a person with a lot of solutions. I pride myself on excellence and want a new opportunity to do my best so everyone involved wins. Whether it's the client, your team, or your organization.

EXPERIENCE

ENTREPRENEUR (APPLIED TO YC)

Loganville, GA | Jan 2023 - Present

I launched 3 SaaS in the past year.
I automated, integrated, and coded a lot of features by myself. I chose to keep coding while finding a job is complicated. The one common technology my projects have in common is Next js.

FRONT-END DEVELOPER MID-LEVEL

Kyndryl. Zona Franca América, Heredia, Costa Rica | Mar 2022 - Dec 2022

Worked on a cloud related project.
Consume apis and manage data with state manager.
Fix css and javascript bugs.
Worked on different components for new and existing features.

WEB DEVELOPER ASSOCIATE (AEM)

Accenture. Cariari, Heredia, Costa Rica | May 2021 - Mar 2022

Creation of an automation toolset to optimize production time.
AEM - Web development and maintenance of web applications.
Implemented new practices to improve performance and efficiency.

SYSTEMS ASSISTANT

Telefónica. San Rafael de Escazú, Costa Rica | Oct 2019 - Apr 2021

Full-stack web development with Sails js.
Rest APIs development with Node js.
Open source integration of a Gitea instance.
I used Vue js in multiple applications.

EDUCATION

SOFTWARE DEVELOPMENT TECHNICIAN

Colegio Técnico Don Bosco. Alajuelita, San José, Costa Rica | Jan 2014 - 2019

Study of the fundamentals of software development.
Creation of projects for technology fairs.

PROJECTS

These are just a few of my projects, you can check my GitHub. The links to my projects are in the link attached.

Devtalk ai - Built with Stripe, Openai, Next js, Prisma (MySQL), Auth0, and other tools. It's a Chat GPT-powered tool that takes organization data and different member roles, to explain prompts in a way everyone understands. (devtalkai.com)

Inkker - Built with Next js, Strapi, Auth0, and more. It's like PeerSpace for tattoo artists. They can find a place to work and be guest artists. (inkker.com)

Toptierperk - Built with Next js, Prisma (MySQL), PayPal apis and more. It allows businesses of all sizes to find perks for their employees. (about.toptierperk.com)

CERTIFICATIONS & COURSES

All my courses and certifications are listed on my LinkedIn. The ones listed down below are the ones I consider the most important.

- Professional Software Architecture Course (Mar 2021)
- Introduction to Vue 3 Course (Feb 2021)
- Vue js Professional Course (Oct 2020)
- React Course (Feb 2021)
- Introductory Course to Blockchain Development: Smart Contracts (Jan 2022)
- Ethereum Course for Developers (Jan 2022)
- Introduction to Solidity Course (Feb 2022)

HONORS & AWARDS

ExpoTec 2017 (Technology Fair) - Computer Science - Second place with project Curare

ExpoTec 2018 (Technology Fair) - Computer Science - Second place with project Check Point

CULTURE

I am a creator. An "idea" kind of person. I take pride on being able to build projects out of my own ideas or ideas that I believe in. I think I am a little bit of a nerd in a good way so you can trust that I will learn quickly because I enjoy it. If I am 70% of what you are looking for, you can trust that the 30% will keep me excited about furthering my career.
